Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 April 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

1. Amendment received April 14, 2004 has been acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosenthal (4,874,996).

Rosenthal discloses a method of retrieving a part of a production machine, with the steps of retrieving the part information (by viewing a part such as wood) by using a disc-shape storage medium (via memory of auxiliary computer 24) having machine part information on each production machine recorded thereon which information comprises information on parts of the production machine (col. 4, lines 19-23), and also using data processing equipment (computer 24) including retrieval means for retrieving a part from the machine part information (col. 4, lines 23-37). The data processing equipment is a portable personal computer (personal computer 17), and the data processing equipment is a numerical controller for controlling the production machines (via actuating control unit 15; col. 6, lines 44-51).

However, Rosenthal fails to disclose that the disc-shape storage medium is portable. It would have been obvious to one having ordinary skill in the art at the time

Art Unit: 3627

the invention was made to modify the memory of file storage of Rosenthal to make it portable, since it has been held that making an old device portable or movable without producing any new and unexpected result involves only routine skill in the art. *In re Lindberg*, 93 USPQ 23 (CCPA 1952).

Response to Arguments

4. Applicant's arguments filed April 14, 2004 have been fully considered but they are not persuasive.

Applicant argues that Rosenthal fails to disclose a disc-shaped portable mass storage medium. The Examiner respectfully disagrees. the Examiner notes that Rosenthal discloses processor 23 connected to an auxiliary programming computer 24 where user can produce, manage and store set-up information in a memory of the auxiliary computer 24 (col. 7, lines 11-33). Thus, Applicant is reminded that during examination, claims are given their "broadest reasonable interpretation . . ." *In re Morris*, 127 F.3d 1048, 1054, 44 USPQ2d 1023, 1027 (Fed. Cir. 1997); *In re Prater*, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-51 (CCPA 1969).¹ Under the broadest reasonable interpretation standard noted above, the Examiner maintains her interpretations. However, to the extent that the Examiner's definitions are either different from or in dispute with Applicant's definitions (and unless the Examiner expressly noted otherwise), the Examiner hereby adopts the following definitions as the

¹ See also MPEP §2111; *In re Graves*, 69 F.3d 1147, 1152, 36 USPQ2d 1697, 1701 (Fed. Cir. 1995); *In re Etter*, 756 F.2d 852, 858, 225 USPQ 1, 5 (Fed. Cir. 1985) (en banc).

broadest reasonable interpretation and ordinary and accustomed meaning in all her claim interpretations:

Storage "In computing any device in or on which information can be kept.

Microcomputers have two main types of storage: random access memory (RAM) and disk drives and other external storage media. Other types of storage include read-only memory (ROM) and buffers." Computer Dictionary, 3rd Edition, Microsoft Press, Redmond, WA, 1997.

5. Applicants' arguments having been found unpersuasive, the rejection has not been withdrawn.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
